

City Policy – COVID-19 Masks & Cloth Face Coverings

May 1, 2021

The City of Fond du Lac recognizes the importance and effectiveness of face coverings. In order to ensure the health and safety of City of Fond du Lac employees and visitors, face coverings will be encouraged for all people entering the City County Building. This policy reflects the wide availability of vaccines and the decline in positive cases in our area.

The City will continue all its mask and PPE policies for on-duty city employees who are interacting directly with and in close proximity to members of the public, as spelled out by their particular department or division. On-duty City employees may ask members of the public to wear a face covering when close proximity is unavoidable.

The City will retain the current COVID-19 room capacity limits within City Buildings until further notice.

FACE MASKS AFTER VACCINATION

The CDC recommends that fully vaccinated* people continue to wear a mask and social distance.

However, the City recognizes that the CDC also states fully vaccinated people can:

- Visit with other fully vaccinated people indoors without wearing masks or staying 6 feet apart.
- You can gather indoors with unvaccinated people of any age from one other household (for example, visiting with relatives who all live together) without masks or staying 6 feet apart, unless any of those people or anyone they live with has an increased risk for severe illness from COVID-19.
- You can gather or conduct activities outdoors **without** wearing a mask except in certain crowded settings and venues.
- If you travel in the United States, you do not need to get tested before or after travel or self-quarantine after travel.
- You need to pay close attention to the situation at your international destination before traveling outside the United States.
 - You do NOT need to get tested **before** leaving the United States unless your destination requires it.
 - You still need to show a negative test result or documentation of recovery from COVID-19 **before** boarding an international flight to the United States.
 - You should still get tested 3-5 days **after** international travel.
 - You do NOT need to self-quarantine **after** arriving in the United States.
- If you've been around someone who has COVID-19, you do not need to stay away from others or get tested unless you have symptoms.

Here's a link to the current CDC guidance for when you've been fully vaccinated:

www.cdc.gov/coronavirus/2019-ncov/vaccines/fully-vaccinated.html

**Per CDC guidance, people are considered fully vaccinated for COVID19 > 2 weeks after they have received the second dose in a 2-dose series or > 2 weeks after they have received a single-dose vaccine.*
